Career development:

- Information system designer,
- Managing the AOP department, then
- Management of the Payment Sector and

General Manager of the branch of ZOP Palilula, which had about 420 employees

Special notes

Meteor, MongoDB, MySQL - 3 years of experience

Meteor is my latest experience and I am a big fan. I develop Meteor applications every day in independent projects and at the request of clients. I know and use MongoDB and MySQL well.

PHP, MySQL, MongoDB - 3 years of experience

I develop PHP applications for various purposes from business, e_commerce to web applications. I used different frameworks: YII, Codeigniter, Lithium, as well as MySQL and MongoDB databases. I know the MVC paradigm and frontend of HTML and JavaScript (jQuery) technology and Ajax, JSON and XML.

JavaScript, jQuery, Node.js - 10 years of experience

I used JavaScript 20 years ago. I started when jQuery wasn't even planned, all kinds of hacks and smaller scripts for different purposes. I am now programming full-stack web and mobile applications using JS and Node.js through the Meteor framework.

Underscore, Lo-Dash & AMP - 2 years experience

JS Support for strings, strings and objects.

Design, UI design, User Interface - 5 years of experience

I have been designing user interfaces, from purely fully responsive Flash websites to lightweight HTML and CSS web applications.

WordPress - 2 years experience

Website development with WordPress.

Bootstrap and Semantic - 2 years of experience

I use Bootstrap 3 and Semantic as a front-end framework for websites.
